Description	Hex nut with opposed slots cut into the top of the nut through the centers of the flats. The slots are on the end opposite the bearing surface.
Applications/ Advantages	The slots are for the insertion of a cotter pin to secure the nut when used with a drilled shank fastener.
Material	Nuts shall be made from a low-carbon steel which conforms to the following chemical composition requirements-- Carbon: 0.47% max.; Phosphorus: 0.12% max.; Sulfur: 0.23% max..
Hardness	Rockwell C32 maximum
Proof Load	72,000 psi.
Plating	See Appendix-A for plating information.
